Superevent Sub-Processors

Last updated on 12 January 2022

Superevent uses sub-processors to provide our services. We've broken the list of approved processors into relevant sections, to give you greater understanding over how these services have access to your information.

Infrastructure Sub-Processors

Superevent uses the following organizations to store/host/collect Personal Information or provide other infrastructure that helps with delivery of our services. These are secure environments with personal data contained within the EU, controlled by the Superevent team and are protected by Data Processing Agreements:

Name	Purpose	Country
Amazon Web Services	Cloud Service Provider	EU
DigitalOcean	Cloud Service Provider	EU

Service Specific Sub-Processors

Superevent works with other third-parties to provide specific functions or features within our platform. These providers will have access to relevant personal information (both in an identifiable and anonymous manner) in order to provide their relevant functions. All data transfer is protected by Data Processing Agreements with Standard Contractual Clauses (SCC's). The use of information is limited to the specific purposes we've detailed below:

Name	Purpose	Country
Intercom	Customer Support	USA
Drip	E-mail Marketing on website	USA
Mailchimp	Transactional E-mail Provider	USA
Sentry	Development Logging	USA
Stripe	Payment Processing	USA
Helpscout	E-mail Support	USA
Office 365	E-mail Support	USA
MUX	Livestreaming	USA
Vimeo	Videos	USA
